

**DICKSON COUNTY HIGHWAY DEPARTMENT
DRIVEWAY PERMIT**

115 SYLVIS ROAD
DICKSON, TN 37055
TELEPHONE: 615-446-2638
FAX: 615-446-6536

All Dickson County Highway Department requirements are for the safety and welfare of the general public.

The Dickson County Highway Department requires homeowners, builders, and/or developers to obtain a driveway permit prior to the construction of any driveway which connects to the county road system. A permit may also be obtained at the Dickson County Planning Zoning & Codes Department.

The width of all driveway shall be a minimum of 20 feet. All driveway connections on cul-de-sacs shall be determined by the Highway Department. **Concrete and asphalt should stop at the existing roadway, and should not be poured into the roadway.**

The applicant is responsible for the cost and the installation of the driveway culvert(s), and should mark both sides of the proposed driveway where it meets the county road. Person(s) building another dwelling off an existing driveway will be responsible for the culvert if it is damaged during the building process.

Erosion control measures shall be employed by the applicant to prevent any materials from obstructing the road(s) and/or ditch(es).

Upon completion, it is the applicant's responsibility to contact the Dickson County Highway Department for the final inspection to ensure all highway and county codes were met. Once all standards and codes are met, the inspector may approve the driveway.

One copy is to be retained by the highway department and one copy should be retained by the applicant. If a culvert is not needed at this time, when ditches are pulled and a pipe is needed, the applicant will be responsible for buying and installing the first pipe.

The highway department will not allow damaged, old, and/or used pipes. The pipes will not be maintained by the highway department unless the inspector has approved of the culvert placed.
